Team Report

TEAM RETROSPECTIVE

What did the team do well during the phase?

We were able to create a plan of attack right away and clearly define everyone's roles, and we remained in constant communication about changes made to the repository

What problems did the team have during the phase?

We all had assessments in other courses so we weren't able to have a consolidated day where we could all work on the project, there was always someone unavailable. As a result we were behind schedule and had to rush to get things finished.

What will the team do in the next phase to fix / avoid these problems?

We will reschedule some meetings to accommodate people's scheduling, as well as make time outside of our meetings to work on the project in case we are unavailable for a meeting.

TEAM MEMBER CONTRIBUTIONS

Team Member	Contribution
David	25%
Ugonna	25%
Cadence	25%
Noel	25%

Details

David:
-Planned out the structure of the meetings
-Implemented the doxyfile for the header files
-Helped brainstorm edits for the design phase document
-Helped brainstorm changes for the software design

Cadence:
-Create the .h files and .cpp stubs
-Helped brainstorm edits for the design phase document
-Helped brainstorm changes for the software design

Ugonna:

-Made the class diagrams and sequence diagrams based on software design brainstorm

-Helped brainstorm changes for the design phase document

-Helped brainstorm changes for the software design

Noel:

-Brainstormed test cases and test partitions

-Helped brainstorm changes for the design phase document

-Helped brainstorm changes for the software design
